PROFESSIONAL EXPERIENCE

S&P Global, Ahmedabad, India
Software Engineer — Jul 2024 – Aug 2025

- Developed and maintained reusable React micro frontend components across internal applications, supporting consistent feature delivery.
- Collaborated with backend and QA teams to refine API contracts, improve state management, and resolve production issues.
- Participated in Agile sprints, requirements discussions, code reviews, and incremental software delivery.

Software Engineer Intern — Jan 2024 – Jun 2024

- Supported frontend and .NET API development using internal visualization tools (Hydra, Hydrob).
- Optimized SQL queries and stored procedures in Microsoft SQL Server for internal dashboards and reporting.
- Participated in debugging, code reviews, and Agile development with senior engineers.

PROJECTS

EduResumePRO — Jan 2026 – Jun 2026
Full-Stack Developer | React, Node.js, Docker, Prometheus, Grafana

- Developed a full-stack application using React and Node.js, leveraging Antigravity for AI-assisted development and technical documentation.
- Integrated Prometheus and Grafana for monitoring system metrics and API performance.
- Containerized services using Docker and implemented GitHub Actions workflows for automated testing and CI/CD.

Agentic Paper Trader — Sep 2026 – Present
Full-Stack Developer & System Design Contributor | Next.js, FastAPI, PostgreSQL, Celery, Redis, LLM APIs

- Designing an AI-powered paper-trading platform generating BUY/SELL/HOLD proposals using technical indicators, structured LLM outputs, and deterministic risk checks.
- Developing system architecture for Alpaca Paper API integration, human trade approval, audit logging, and emergency kill-switch controls.
- Following Agile practices with sprint planning, epics, user stories, and GitHub task tracking; documenting requirements, architecture, and development progress in GitHub Wiki.
